Experience

07/14 - 09/14 Assistant at IT & Engineering Department

Tejarat Mandegar

I worked there as a summer job while I was in high school and I experienced many different things such as server maintenance, hardware repairing and maintenance, logging and archiving daily tasks, computer setup and assembling and more.

07/17 - 09/17 iOS Developer

Mibarim

I started working here as an iOS Developer trainee and was the only iOS Developer there for a month in which I learned to develop an iOS app through self-learning. After developing 2 apps there I met my goal which was gaining some experience as iOS Developer and a short term summer job.

07/18 - 05/19 iOS Developer

Nobaar

I launched their iOS app and was responsible for providing back up and monthly-service/bug-fixes/new feature integration for the app.

05/18 - 07/19 Freelance iOS Developer

TeamIO

First I joined this team as Xamarin.forms developer but in the process we felt that Xamarin is not as good as it needs to be at the moment so we switched back to native programming. While working there I worked on few project most notable of them were two IoT apps and one online streaming app.

02/19 - 05/19 Freelance iOS Developer

Information Technology and Cyber Space Department of
University Of Tehran

As the universities app needed some updates and the previous developer was out of reach I was tasked with updating app.

07/19 - now Freelance iOS Developer

Agency Wolfe

In this team I am responsible for developing and updating of an cryptocurrency based integrated wallet which uses several cryptocurrency tokens for it's transactions and supports different type of transactions such as pay as you go and scan to pay.
